# Monthly Fuel Surcharge Notification

The American Samoa Power Authority is informing its customers about the monthly fuel surcharge rate, which is the direct cost of fuel to generate electricity. The charge for each kilowatt hour (kWh) comprises the “base rate” and the “fuel surcharge rate.”

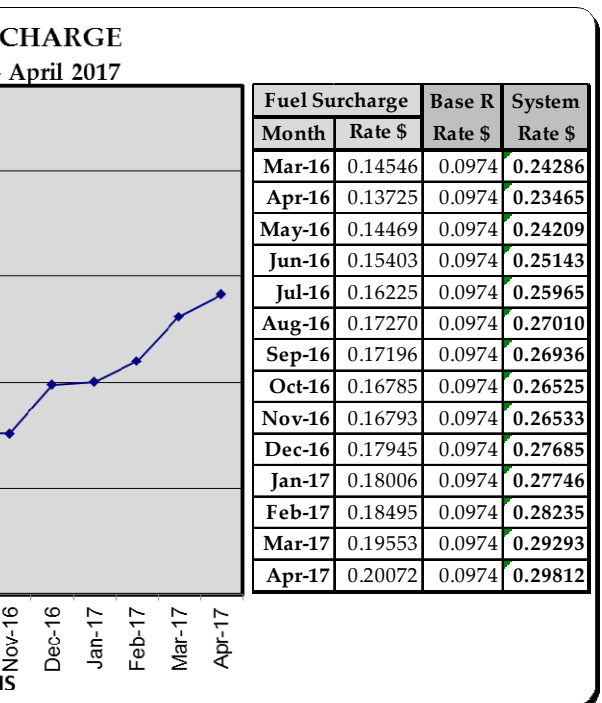

The base rate, which remains the same monthly for all electric customer classes, pays for ASPA’s operating costs and for infrastructure upgrades needed to get power to your home and business.

The fuel surcharge rate changes monthly due to fluctuating fuel costs. The fuel surcharge is approximately 70%-

75% of the total kWh price. This is considered a “pass-through” revenue because it goes directly to pay the local fuel suppliers for diesel fuel consumed at the five power plants in Tutuila, Manua and Aunuu.

The fuel surcharge rate also includes the “Renewable Reduction” from electricity produced by the ASPA Photo Voltaic panels. The avoided fuel costs or fuel being saved from producing electricity through the Photo Voltaic panels, is passed on to customers as the “Renewable

<b>Fuel Surcharge and System Rate for April 2017</b>
